

## Temasek Polytechnic Joins Hair for Hope 2010

Our Hair for Hope team visited Temasek Polytechnic on 3 August 2010 for their satellite event and was welcomed with a festive atmosphere, and with everyone geared up for the shave. Being first time participants in Hair for Hope, Temasek Polytechnic students were excited to see 72 of their peers shave in support of children with cancer.

Among the 72 shavees were eight brave women, one of them their teacher, Ms Tan Hwee Hoon. When asked why she shaved, she candidly replied, "it's really for the kids (with cancer) they have gone through much and this is just one way to show that they are not alone." We commend Ms Tan's selfless act of support and more importantly for being a role model for her students that one should go beyond lip service in their support for a cause.

We thank Temasek Polytechnic for the warm welcome and we look forward to seeing their students support the cause in many other ways! May the Hair for Hope experience pave the way for a meaningful experience for both the shavees and the school.
